RIVER BLYTH PORT OF HEALTH AUTHORITY

ANNUAL REPORT

of the

Port Medical Officer of Health

for YEAR 1968

WATERLOO HOUSE,
WATERLOO ROAD,
BLYTH.

January, 1969.

To the Chairman and Members of the River Blyth Port Health Authority.

Ladies and Gentlemen,

Once again it is my privilege to place before you the Annual Report on the work of the Port Health Administration for the Port of Blyth, for the year 1968.

As in preceding years this report is presented in accordance with the instruction issued by the Minister of Health—Form Port 20, and Circular 33/52. Detailed information will be found in the Sections I to XVI.

The total number of vessels which arrived during the year was 1,584 including Fishing Vessels. This is slightly below last year's figure. Foreign Vessels trading Foreign and Coastwise numbered 217 including Fishing Vessels, which is a decrease on last year. The number of arrivals direct from Foreign Ports was substantially the same.

The amount of Coal and Coke shipped from the Port during the year was 2,868,744 tons; this also includes Bunker Coal.

There has been an increase of almost 50,000 tons in the export of coal as compared with last year and also an increase in the amount and variety of imports and exports particularly to and from Foreign Ports.

Imports discharged at the Port were: Timber 13,063 loads, Iron 2,939 tons, Steel Bars 3,139 tons, Sand 2,521 tons, Steel Wire 1,222 tons, Paper 2,690 tons and Sundries 3,871 tons.

PUBLIC HEALTH (SHIPS) REGULATIONS, 1966

The above Regulations became operative from the 1st April, 1966, and deal with the Infectious Diseases, now to be known as Quarantinable Diseases, sanitary control of ships and persons, Deratting Certificates, etc. Certificates issued will be found in the appropriate tables.

INSPECTION OF VESSELS

The work dealing with nuisances and defects (structural and otherwise) will be found in the appropriate tables included in the report.

I again record with pleasure the kind assistance received from time to time from the Blyth Harbour Commission, River Pilots, H.M. Customs Officers, Immigration Officer, also the Ministry of Transport Surveyors for their help and co-operation with the staff of the Port Health Authority.

R. J. P. R. CAMPBELL, M.B., Ch.B.,
Medical Officer of Health.

SECTION IV

Inland Barge Traffic

There is no barge traffic at the Port.

SECTION V

Water Supply

78 routine samples of water were submitted for bacteriological examination, of these only two submitted from North and West Quays, South Harbour, were found to be unsatisfactory but indicated such heavy contamination that further samples were submitted from all the hydrants on these quays. Seven of these showed such heavy contamination that it was decided to stop supplying vessels from these points until the source of the contamination could be found and eliminated. After consultation with the Newcastle and Gateshead Water Company and the Engineer of the Blyth Harbour Commission thorough cleansing of the whole system, including the dismantling and sterilising of all hydrants, was carried out after which further specimens showed the contamination to have been totally eliminated and the supply to vessels was then recommenced.

During the latter period, 33 samples were submitted for bacteriological examination and 20 were found to be unsatisfactory.

SECTION VI

Public Health (Ships) Regulations, 1966

No change.

SECTION VII

Smallpox

1.—The Northern Regional Hospitals Board have made arrangements for the admission of Smallpox cases to the Langley Park Isolation Hospital, Co. Durham (Telephone No.: Chester-le-Street 3207). The Doctor in Charge of the hospital will be Dr. Gavin Millar, of Green Ridge, Farnley Mount, Durham. His Telephone No. is 2395.

2.—The Northumberland County Council are responsible for the ambulance service. Dr. A. Donaldson, the Medical Officer for the Blyth and Bedlington Local Authorities, is responsible for the vaccinal state of the ambulance crews.

3.—NAME OF SMALLPOX CONSULTANT AVAILABLE :—

DR. WILSON MINNS,
South Rigg, Humshaugh,
Hexham.
Home Telephone No. :
Humshaugh 317.

4.—FACILITIES FOR LABORATORY DIAGNOSIS OF SMALLPOX. Laboratory facilities are provided at the General Hospital, Westgate Road, Newcastle upon Tyne, 4.

SECTION VIII

Venereal Disease

No change.

SECTION IX

Cases of notifiable and other Infectious Diseases on ships.

Table D

Category	Disease	Number of Cases during the year		Number of Ships concerned

Cases landed from other ships	Nil	Nil	Nil	Nil

SECTION X

Observation on the occurrence of Malaria in Ships

No cases of Malaria have been reported during the year.

SECTION XI

Measures taken against Ships infected with or suspected of Plague

Inquiries as to the prevalence of rats are made on all ships in Port (whether in possession of Deratting Certificates or Deratting Exemption Certificates or not) and a systematic inspection is carried out on all ships arriving directly or otherwise from foreign ports.

A systematic search for evidence of infestation is carried out on all vessels.

SECTION XII

Measures against Rodents in Ships from Foreign Ports

1.—On arrival at the Port vessels are examined and if there is any evidence of rats notice is at once served on the Master. The Port Health Authority have their own official Rodent Operator. Particular attention is given to vessels arriving directly or indirectly from infected areas.

2.—Rats when caught are examined and facilities are provided by the Public Health Laboratory, Newcastle upon Tyne, for detailed bacteriological examination of any specimens when necessary.

3.—For some years now there has been no instance of a major infestation of rats on any vessel to the extent of requiring wholesale fumigation. If any such instance occurred, the shipping agents would arrange for the fumigation to be carried out by one of the approved firms mentioned below. The whole process would be supervised by Officers of the Authority.

In the case of fumigation by Hydrogen Cyanide or Methyl Bromide, strict precautions have to be observed to safeguard all the persons involved and the whole process carried out in accordance with the Regulations.

Contractors approved for the carrying out of the above services in this Port are:—

MESSRS. CONTRA PEST SERVICES LTD.,

Rekendyke Lane,

South Shields.

Tel. No.: South Shields 63388.

MESSRS. RENTOKIL LABORATORIES LTD.,

6 Regent Street,

South Shields.

Tel. No.: South Shields 4921.

4.—In the Construction of modern vessels considerable progress has been made in the provision of rat-proof compartments. Bulkheads and partitions are usually steel, and with the minimum of timber, it is difficult for rodents to find harbourage. Modern Naval Architecture is coping with the problem satisfactorily.

Table E

Rodents destroyed during the year in Ships from Foreign Ports

Category				Number
Black Rats	—
Brown Rats	—
Species not known	—

Infected with Plague	—

The total number of brown rats recovered from the Quayside after poison baits have been put down was 396.

All rats recovered are examined and where any abnormalities are noted are sent to the Public Health Laboratory, Newcastle upon Tyne, for further detailed examination.
